Overview

What is the workshop about?

What can I expect to produce?

What do I need to do?

Follow the instructions in the worksheet, but feel free to experiment. In order to find the software and set it up you will to complete parts 1 and 2 of the Crystal and GarageBand setup section.

Use the Table of Contents area on the left of the screen to jump between sections if you do not want to scroll up and down

Crystal and GarageBand setup

Crystal runs as a plug-in inside GarageBand. To set both pieces of software up do the following steps:

1. Run GarageBand by clicking on the GarageBand icon

in the **Dock Bar** at the bottom of the screen. If the icon is **not** there then do the following:

- Click on an unoccupied area of the Desktop.
- Select `Go > Applications` from the menu at the top of the screen.
- Scroll down to GarageBand in the list and **double click** on it.

2. At the **Welcome to GarageBand** screen click Continue

3. At the **What's New in GarageBand** screen click Get Started

4. From the **Choose a Project** dialogue (Figure 1) select `Empty Project` and click Choose
